

In regards to Ishikawa-Noto Earthquake (second report)

We would like to announce that we have confirmed the safety of all of our employees in the midst of large-scale earthquakes occurring repeatedly from the Noto region of Ishikawa Prefecture since the evening of January 1, 2024.

Also, we have not identified any abnormalities in the infrastructures of our three plants(Honsha Plant, Gohkakizawa Plant, and Namerikawa Plant) so far with our inspections.

Although not critical, some damages have been observed inside and outside of our buildings. Also, a part of our equipment were found fallen down. We therefore resume our operations after inspections and repairs. We apologize for any inconvenience this may cause and would appreciate your understanding.
