

In regards to Ishikawa-Noto Earthquake (preliminary report)

We would like to announce that no critical issues have been identified in infrastructure or production equipment in our sites (Honsha Plant, Gohkakizawa Plant, and Namerikawa Plant) after large-scale earthquakes occurred repeatedly in the Noto region of Ishikawa Prefecture beginning at 16:06 on January 1, 2024.

We will continue to inspect our production facilities and analytical equipment tomorrow and onward to update and summarize any damages that might have occurred. Thank you.
