

## In regards to Ishikawa-Noto Earthquake (final report)

Regarding the effects of the large-scale earthquakes in the Noto region of Ishikawa Prefecture that began on January 1, 2024, subsequent inspection work at our three manufacturing sites (Honsha Plant, Gohkakizawa Plant, and Namerikawa Plant) have been mostly completed, and we hereby confirm that no critical abnormalities have been found.

We therefore gradually resume our production with facilities of which we have confirmed the integrity from January 7<sup>th</sup>.

However, the recent earthquakes have affected a part of the supply chains for our raw materials and other supplies, and our upcoming manufacturing and shipping activities may be impacted.

We ask for your understanding on the above, and we apologize for any inconvenience this may cause to some of our customers. Thank you.
